- Internet using EFSnet® web payment services

Compatible Platforms:

- ACR®
- AIM®
- BASSpoiNT®
- H&R Computer®
- RSP® (Matrix Solutions)
- MSS Global®
- NCR Falcon®
- Optimal Robotics®
- Paradise System®
- RORC®
- Scan Master®
- White House®

A LOOK AT THE BENEFITS AND FEATURES

- Transaction times are greatly reduced from 8-20 seconds down to 2-3 seconds.
- You can use the same internet connection that is used for everyday business communication to process transactions through the EFSnet service to help lower the cost of doing business.
- Real Time Access: Processing transactions via the internet also means that real-time management and tracking of transactions can be accomplished with a web browser through the EFSnet Merchant Service Web site. Additionally, custom applications can retrieve transaction histories programmatically.

With EFT Manager you can process:

- Credit
- PiN-Secured Debit
- Signature-based Debit
- Electronic Benefits Transfer (EBT)
- Automatic Clearinghouse (ACH)
- Gift Card
- TeleCheck Services
- Corporate Charge
